🔗 Portfolio

SKILLS

FRONTEND Skills

React.js, JavaScript, React Js, Next.js, TypeScript

Backend Skills:

Node.js, Express.js, RESTful APIs, AWS (EC2, S3, ECS), CI/CD, Redis, Python, Django, Flask, MongoDB, PostgreSQL, Docker, REST, WebSockets

PROFILE

Full-Stack Developer with 5+ years of experience developing scalable and secure web applications for InsurTech. Proficient in React, Next.js, Node.js, Express, Django, Flask, and RESTful APIs as well as integration of third-party services. Familiar with PostgreSQL, MongoDB, debugging production code, and performance optimization. Developed GenAI bots using Retrieval-Augmented Generation (RAG) with OpenAI and AWS Bedrock (LLaMA).

EDUCATION

Pacific School of Engineering, *Bachelors degree in computer science (CPGA: 8.1)* Jul 2015 – Apr 2019 | Surat

ORGANIZATIONS

Digiqt Technolabs 🌐, *Senior Software Developer*

Jan 2021 – present | Ahmedabad, India

Responsible for developing and deploying scalable web applications using the ReactJS, Node.js/Express.js, Flask, and Django technology stacks, ensuring the design of highly reliable RESTful APIs and robust application architectures.

Charged with managing the database architecture and performance tuning efforts on PostgreSQL, MySQL, and MongoDB databases, including schema creation, query tuning, and indexing.

Owning the production environment running on Linux OS, responsible for configuring servers, managing deployments, troubleshooting, and monitoring of production.

Creating and managing the CI/CD pipeline using Jenkins, Docker, and GitHub Actions.

Leading a team of developers to deliver projects end-to-end, from task planning to deployment and releases.

Ensuring production systems' reliability and InfoSec, analyzing potential risks and implementing proactive processes for better production stability.

Maintaining a high production support rate by fixing around 95% of incidents within SLA through proactive monitoring, debugging, root cause analysis, and preventive maintenance.

Ensuring a 20% increase in system uptime due to performance optimization and proactive monitoring efforts.

ACHIEVEMENTS

Chatbot Modernization & User Impact

Jan 2026 – Apr 2026

Revamped the end-to-end insurance chatbot system, integrating WebSockets for real-time communication and seamless user interactions, significantly enhancing user experience and engagement while driving increased user adoption.
